SMART CRYPTOCURRENCY MANAGEMENT

# ALGORITHMIC TRADING SOFTWARE

## THE SMART WAY

### SMART CRYPTO MANAGEMENT

LearnTradeEvolve offers a fully automated management solution for the secure trading of an adaptive crypto index. A comprehensive risk management system monitors all processes and independently makes decisions in the interests of the customer.
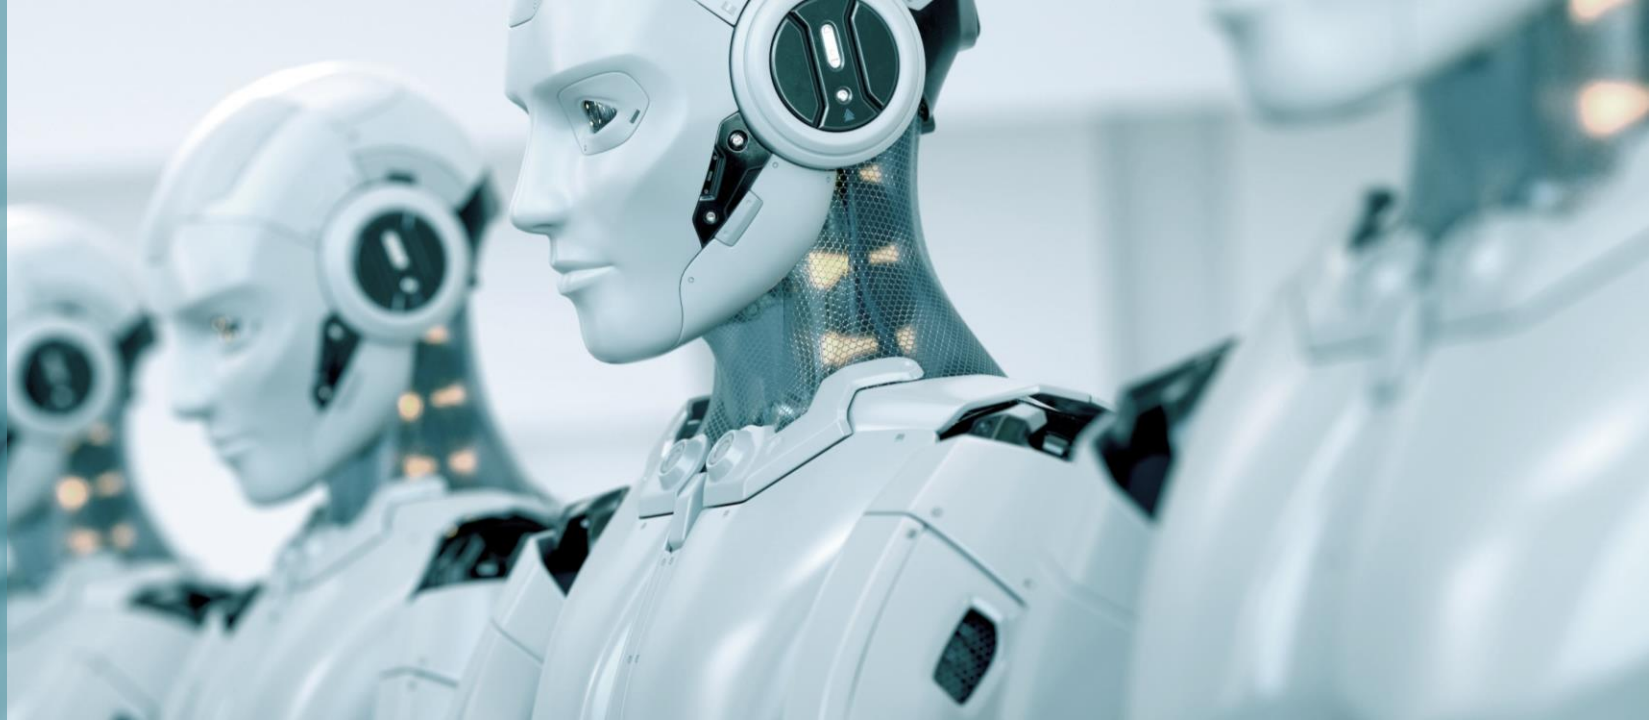

# Extending the Lead over the Competition

**LEARNTRADEEVOLVES VISION**

LearnTradeEvolve consists of a team of experienced crypto traders and engineers who are dedicated to developing the best strategic management tool for their clients to safely and profitably navigate the volatile crypto market.

# KEY FEATURES

## DRIVEN BY TECHNOLOGY

**Index Trading**

**Potential Analysis**

**Risk Management**

**Order Management**

# More Performance with Less Risk

## Smarter Index

### RISK CONTROL ○ ○ ○

LearnTradeEvolve trades the most trusted cryptocurrencies simultaneously when they are trending to reduce market risk. By not trading individual assets, it removes many of the biases and uncertainties that come with selecting individual assets.

**01**

**DIVERSIFICATION**
Reduction of individual risk by combining performances

**02**

**MARKET AVERAGE**
Thanks to the broad diversification, you benefit from the general market trend

**03**

**LIQUIDITY**
Trading possible with low transaction costs

**04**

**PERFORMANCE**
Higher profit opportunities through the use of volatile assets

**05**

**TREND MARKETS**
Weighting of the portfolio to focus topics e.g. AI possible

# Keeping an Eye on the Overall Market **Multitimeframe Trend Filtering**

We use a trend filter developed in-house for our intelligent risk management. We currently only allow trades in bullish/positive market phases and close all orders after bearish/negative trend changes.

This enables us to reliably determine the current market phase and to close open orders after trend changes with only a short delay.

# Make Better Market Decisions Potential Analysis

○ ○ ○

**Advantage through Multidimensional Evaluation**

We use a potential indicator developed in-house to assess the current market risk and identify trading opportunities. This takes data from various time frames and indicators and provides a meaningful interpretation of the market.

Bitcoin / TetherUS · 4Std. · BINANCE
36341.08   0.01   36341.09   O 36681.86  H 36744.00  L

**01**

**Entry and exit signals**

Real-time analysis of the market for decision-making
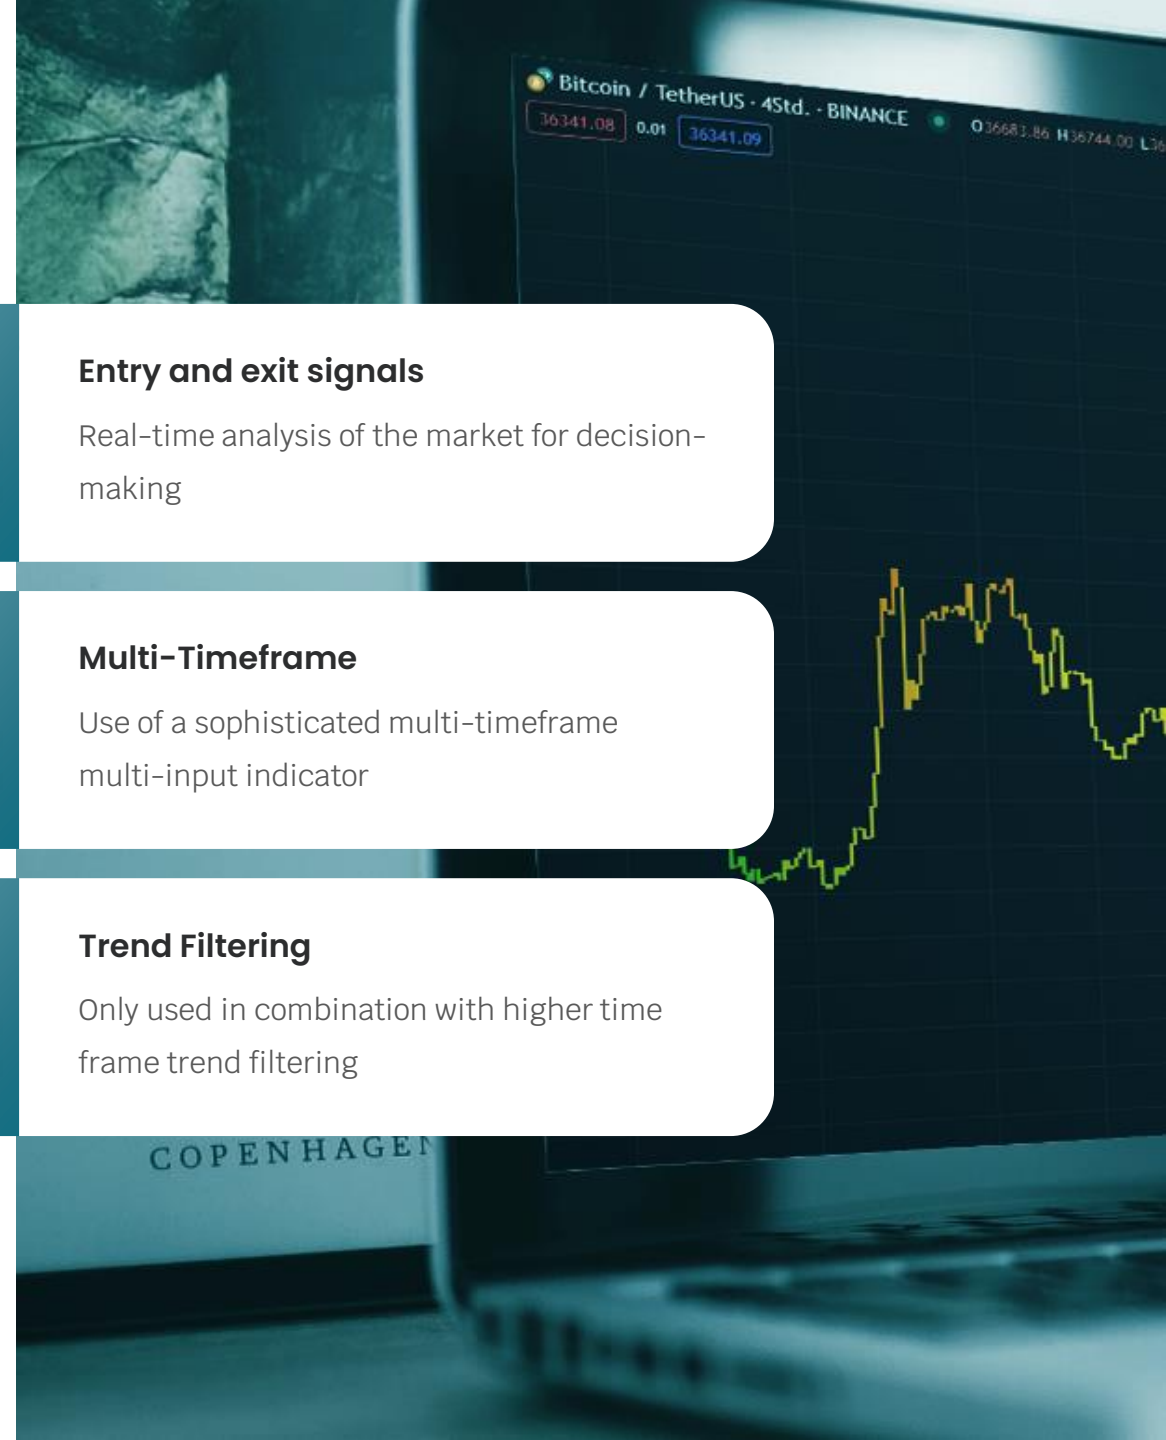

**02**

**Multi-Timeframe**

Use of a sophisticated multi-timeframe multi-input indicator

**03**

**Trend Filtering**

Only used in combination with higher time frame trend filtering

COPENHAGEN

# BENCHMARKED TRADING

Below you can see the latest developments.

**Improved Market Analysis**

Improving the recognition of market changes will improve overall performance

**Dynamic Coin Whitelisting**

Dynamic addition and removal of coins to improve the index

**Short Direction Trading**

Introduction of shortings to enable trading in both trend directions

**Adding further Exchanges**

In the future, our software will also be able to be used for other stock exchanges

**AI Integration**

Order and risk management is to be supported by AI

**Web platform**

In future, we will offer our customers a web platform

# Risk Management
# Makes the Difference

## Safely through volatile markets

Due to its high volatility, the cryptocurrency market offers the opportunity for high returns, but at the same time it offers the risk of high losses. Our adaptive index increases the risk in rising markets and reduces the risk in falling markets. This allows you to get through volatile times safely.

**+5131%**

RISK OF LOSS

## Drawdown is the Decisive Factor

Drawdown is more important than profit, as it measures the risk and potential losses of an investment and thus ensures long-term stability and capital preservation.

## And then came the crash...

Backtesting Period: 08.11.2021 – 30.12.2022
Startbalance: 10.000,00€

| **Bitcoin** | | **Index Top 10 Coins** | | **LearnTradeEvolve System** | |
|---|---|---|---|---|---|
| Endbalance: | 2.557,00€ | Endbalance: | 1.472,00€ | Endbalance: | 11.306,00€ |
| Performance: | -74,43% | Performance: | -85,28% | Performance: | +13,06% |

# Your **Success** is our **Success!**

Starting with us is completely uncomplicated. Small accounts benefit from a permanent free usage fee. We only benefit if you benefit.
